
NEOBLAZER

CARD WARS

The rules of the game are simple: After you cut out the cards, sort them into characters and items (4 cards in each category), shuffle them and place the two small decks face-down so no one can see them. Each player gets one character card and one item card. The number at the top of your character card indicates the item you need to get in order to win the game, while the number at the bottom indicates the item you need to destroy so you can sabotage your opponents and win the game that way. The rounds work clock-wise with each player being able to either swap cards with another player or destroy their card. It's their choice. The game is meant to have a rapid fire pace with small rounds that last seconds. Players can decide who wins based on how many rounds they want to play in total. You can have a quick game while waiting at the bus stop or have it last for hours by playing many rounds again and again.
